

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Comparison of the Sullivant Catalogue of the Plants of Franklin County, Ohio, with the List of 1891 by Selby and Craig.

A little more than fifty years ago Mr. Wm. S. Sullivant published a catalogue of the phænogams and vascular cryptogams of Franklin County, Ohio.

A revision of this catalogue, with such additions as have been observed, has been published, and the object of this note is to point out the number of new plants introduced into a central county of Ohio during the last half century. The interest in a comparison of these two plant lists is increased by the fact that the surveys and explorations of the county by Prof. Sullivant and his co-laborers of fifty years ago were for that time industrious and painstaking.

Franklin County is a fair type of the counties occupying the drift-covered region of central Ohio, and shows the intimate relation of a flora to the geological formation, climatic condition and topographical features of the district included within its limits.

I have tabulated in order of their sequence the natural orders which are now represented by ten or more species.

	ADDITIONS.		TOTAL. IN COUNTY.
	INTRODUCED.	TOTAL.	
Ranunculaceæ	3	7	30
Cruciferae	9	13	31
Violaceæ	1	4	11
Caryophyllaceæ	1	1	13
Leguminosæ	7	9	40
Rosaceæ	2	8	36
Umbelliferae	3	5	24
Rubiaceæ		5	13
Compositæ	20	53	140
Primulaceæ	1	3	11
Solanaceæ	5	6	10
Scrophulariaceæ	2	2	29
Labiatae	5	10	42
Polygonaceæ		4	22
Euphorbiaceæ	13	4	10
Urticaceæ		2	13
Cupuliferae		3	14
Orchidaceæ		3	19
Liliaceæ	1	2	25
Cyperaceæ		5	75
Gramineæ	5	14	79
Filices		2	25
Ophioglossaceæ		2	5
Total in County			1002
In Old Catalogue			779
Introduced Plants			15%
Additions			223
Introduced, nearly			40%
